Seeking a backend developer role specializing in Django, Python, and Node.js, driven by a passion for creating efficient and scalable solutions. With hands-on experience in developing robust web applications, I aim to leverage my expertise to contribute to innovative projects while continuously improving code quality and performance metrics.

PROFESSIONAL EXPERIENCE

Talenrn   SEP 2023 – Oct 2023
Web Developer Intern

- As a web developer intern at Talenrn, I contribute to designing and implementing web solutions, collaborating with teams to enhance user experience and functionality, and learning industry best practices.
- During my internship at Talenrn, I successfully optimized website loading times by 20% through code refactoring and implemented a responsive design that increased mobile traffic by 15%.
- In my internship at Talenrn, I utilized a tech stack including HTML, CSS, and JavaScript to develop responsive web interfaces, ensuring cross-browser compatibility and enhancing user interaction functionalities.

Self-Project   DEC 2023 – Feb 2024
Full stack Developer

- A social app built with Django auth offers functionalities like dislikes, commenting with replies, real-time chats, and post creation. It ensures seamless user interaction, scalable backend using Django and Python, and robust security measures for a dynamic social experience.

Self-Project   OCT 2023 – Dec 2023
Full Stack Developer

- The Insta-clone utilizes React for dynamic UI, Firebase for real-time data management, and Google Auth for secure authentication. Features include likes, comments with replies, chats, post creation, and follow/unfollow functionalities for an engaging social media experience.

EDUCATION

R D Engineering College Ghaziabad   2020-2024
Bachelor of Technology: Computer Science and Engineering, 7.2 CGPA
10+2th (Intermediate) Janta Inter College Junawai (Sambhal)   2020
Science Stream (PCM), 60%

SKILLS & OTHER

- Python
- C++
- Node.js
- JavaScript
- Django
- AWS

CERTIFIATIONS

Certified by HackerRank in Python (Basic and Problem Solving), demonstrating proficiency in foundational Python concepts and problem-solving skills validated through practical coding challenges.

ACHIEVEMENTS & AWARDS

- 4 ☆ at HackerRank in Problem Solving
